The benefit(s) payable under eligible policy is(are) protected by PIDM up to limits. Please refer to PIDM's TIPS Brochure or contact Allianz Life Insurance Malaysia Berhad or PIDM (visit www.pidm.gov.my)

Retirement... why it's not the end, but a new beginning

Time flies.

Five more years and I reach 55, the age I plan to retire. Yes, it has always been my dream to retire early and spend more time with my loved ones. So, with my career finishing line fast approaching, I am experiencing a mix of emotions. I feel excited to have made it successfully so far but if I am honest with myself, I feel a little anxious too. Don't get me wrong, I have had a fulfilling career and have been fortunate enough to be able to enjoy some of life's pleasures such as buying a nice family home, yearly vacations, supporting my boy through university and now, my daughter in Australia.

It's been a long journey and one well worth it

I am looking forward to a new phase of life, new experiences. My wife is already making a list of things we can do, places to go, now that we have the time. She says I still owe her a honeymoon, because we were just too broke when we got married at age 27. So now is our time. A new adventure beckons. It is our chance to live out our grandest aspirations. Because we retire from work, not life.

However, I can't help feeling a little anxious

Mixed in with the excitement is a thread of anxiety. I nail that down to one concern – whether I have adequately prepared my finances for retirement and whether I am sufficiently covered should the unforeseen happen.

**Employees Provident Fund
(EPF) Savings**

Personal Savings

Investments

Properties

But recent changes in the world economy has given me much to ponder:

- Do I really have enough to live the retirement lifestyle I desire?
- Will I need to sacrifice my retirement aspirations due to lack of money?
- Are any of my expected retirement returns guaranteed?
- How badly will inflation eat up my retirement fund?
- If there is a shortfall, do I have enough time to catch up with my savings?

These are hard questions but ones I need to answer if I want to face retirement with optimism.

Getting the right numbers clear up doubts

The first thing I did was to arrange a meeting with HSBC's customer service banker. He is someone I can turn to for help in sorting out my finances whenever I needed to.

After serving me a cup of coffee, we discussed how much my wife and I would need to retire comfortably.

- Then I discussed with him the amount we may need for medical contingencies and emergencies.
- Then we set out to estimate my rate of return from my investments (from my stocks, mutual funds, fixed deposits, property investments).
- From these figures we discovered that my retirement funds are indeed on track with my plans.

However, there was just one thing – it may not be enough for us to enjoy the kind of retirement lifestyle we envisioned.

“I aspire to retire in 5 years time. How can I boost my retirement income?” I asked

My customer service banker then began proposing various products to help provide additional retirement income as well as insurance coverage. The one that caught my eye was **HSBC's UniversalTreasure Plus**.

Basically, it is a retirement plan that lets my savings play catch up as well as provide insurance coverage. I will enjoy the following benefits:

Flexibility in deciding how I want to save whether via a single premium or regular premium for only 5 years.

Coverage for Death.

Increasing annual guaranteed income in the form of Guaranteed Cash Payment (GCP)¹. GCP is payable annually up to maturity at the end of 20 years.

Flexibility in deciding whether to receive the Guaranteed Cash Payment (GCP) at the end of 1st policy year or end of 6th policy year². Option to withdraw the GCP when due or deposit with Allianz Life Insurance Malaysia Berhad (“Allianz Life”) to earn interest³ or to reinvest the GCP in Allianz Universal Life Fund II for non-guaranteed potential upside⁴.

Receive the higher of:
25% of Total Premium Paid or
Non-Guaranteed Account
Value⁴ at maturity at the end
of 20 years.

Non-guaranteed potential upside⁴, if any.

When I indicated that I was interested in a single premium plan of RM300,000, with immediate Guaranteed Cash Payment, my customer service banker showed me my guaranteed and non-guaranteed potential returns.

¹The percentage of Guaranteed Cash Payment (GCP) shall depend on the chosen premium payment term (Single Premium or Regular Premium) and type of GCP (immediate GCP or deferred GCP). The type of GCP shall be selected at the inception of the policy. The GCP and Guaranteed Maturity Benefit will only be payable provided that all premiums due and any interest charged on late premiums and any other indebtedness to Allianz Life are paid.

²This decision has to be made at the inception of the policy and no changes can be made thereafter. The percentage of Guaranteed Cash Payment (GCP) shall depend on whether you have chosen single premium or regular premium and also if you have chosen to receive GCP starting from end of 1st policy year (immediate GCP) or starting from the end of 6th policy year (deferred GCP).

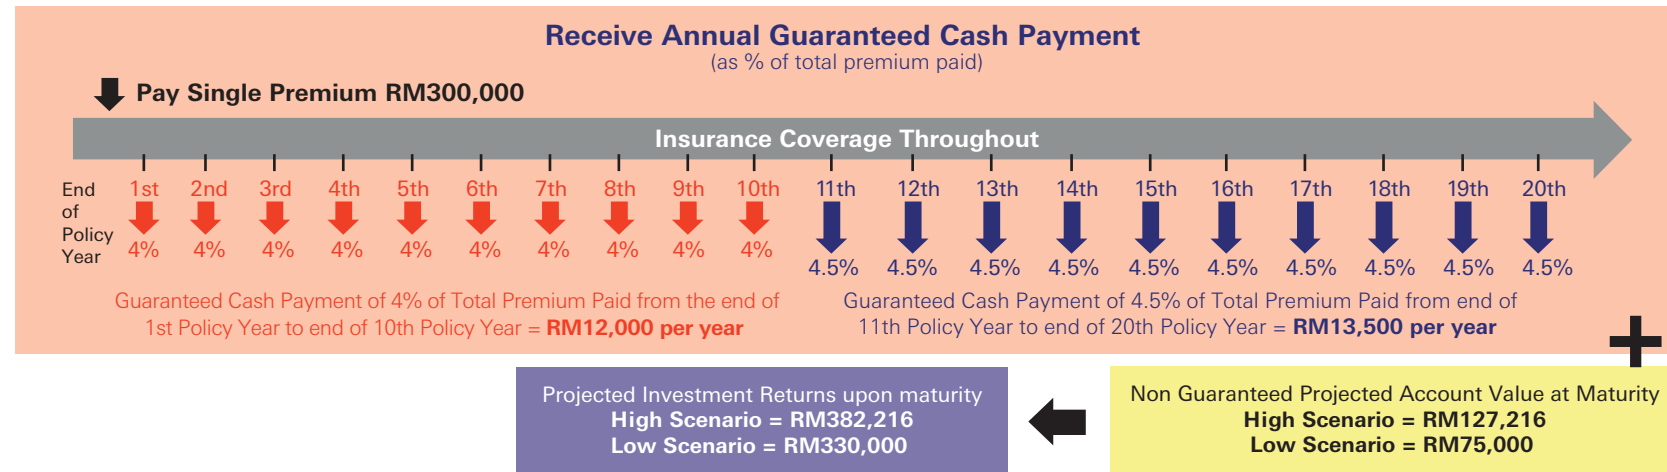

³Interest on the Guaranteed Cash Payment (GCP) deposited with Allianz Life is at a rate to be determined by Allianz Life which may vary from year to year. The actual interest rate may be higher or lower depending on Allianz Life investment earnings and operational results.

⁴The Account Value and potential upside is not guaranteed and may vary according to the actual investment performance of Allianz Universal Life Fund II. High scenario is illustrated at the rate of return of 5% p.a. Low scenario is illustrated at the rate of return of 2% p.a. Future rate of return are not guaranteed and vary according to investment results experienced by Allianz Life. The rate of return over a medium to longer term is likely to be positive however it is possible to have a negative rate of return in any particular month or over a longer term. The rate of return is subject to investment tax and Fund Management Charge. Please also refer to the Sales Illustration for projection on low and high scenario.

HSBC's UniversalTreasure Plus - Projected Investment Returns

This diagram assumes Male Life Assured aged 49 years old with, who selected **single premium mode of RM300,000 and Immediate Guaranteed Cash Payment (GCP)**. (When the GCP is due and payable, he chose to withdraw it).

INCREASING GUARANTEED ANNUAL INCOME

	Total Payout over 20 years	
Non Guaranteed Projected Account Value at Maturity	High Scenario RM127,216	Low Scenario RM75,000
Total Projected Investment Returns upon maturity	High Scenario RM382,216	Low Scenario RM330,000
Annualised Return upon Policy maturity	Low Scenario	High Scenario
Guaranteed Annualised Return	0.75%	
Total Annualised Return	0.75%	1.81%

- The guaranteed annualised return is projected based on the illustrated single premium paid, total Guaranteed Cash Payment (GCP) and guaranteed Maturity Benefit, i.e. 25% of Single Premium Paid.
- The total annualised return is projected based on the illustrated single premium paid, total Guaranteed Cash Payment (GCP) and projected Maturity Benefit.

Important Notes:

- Upon the policy maturity at the end of the 20th policy year, you will receive the higher of guaranteed 25% of Total Premium Paid or non-guaranteed Account Value at maturity. The Account Value and potential upside is not guaranteed and may vary according to the actual investment performance of Allianz Universal Life Fund II.
- High scenario is illustrated at the rate of return of 5% p.a. Low scenario is illustrated at the rate of return of 2% p.a. The rate of return is subject to investment tax and Fund Management Charge. Please also refer to the Sales Illustration for projection on low and high scenario.
- Future crediting rates are not guaranteed and vary according to investment results experienced by Allianz Life. The crediting rate over a medium to longer term is likely to be positive however it is possible to have a negative crediting rate in any particular month or over a longer term.
- The GCP and Guaranteed Maturity Benefit will only be payable if all premiums due and any interest charged on late premium and any other indebtedness to Allianz Life are paid at the end of policy year.
- Customer may choose the desired GCP Payout Option at the inception of the policy.
- The Premiums that You pay contribute to both the savings and protection elements of the product, e.g., Death Benefit. If You are looking for financial products with savings element, You may wish to compare annualised returns of this Policy with the effective returns of other investment alternatives.
- For additional info please refer to the Key Feature Document, Sales Illustration, Product Disclosure Sheet and Fund Disclosure Sheet of HSBC's UniversalTreasure Plus.

In short, if I hold the plan till maturity, I will receive guaranteed increasing annual income¹ and maturity benefit¹. In an uncertain economic environment, having a plan that provides guaranteed benefits is indeed reassuring.

I also wanted to get on for my wife, with a regular premium payment plan of 5 years, in order to have greater flexibility in funding our retirement lifestyle as well as insurance coverage.

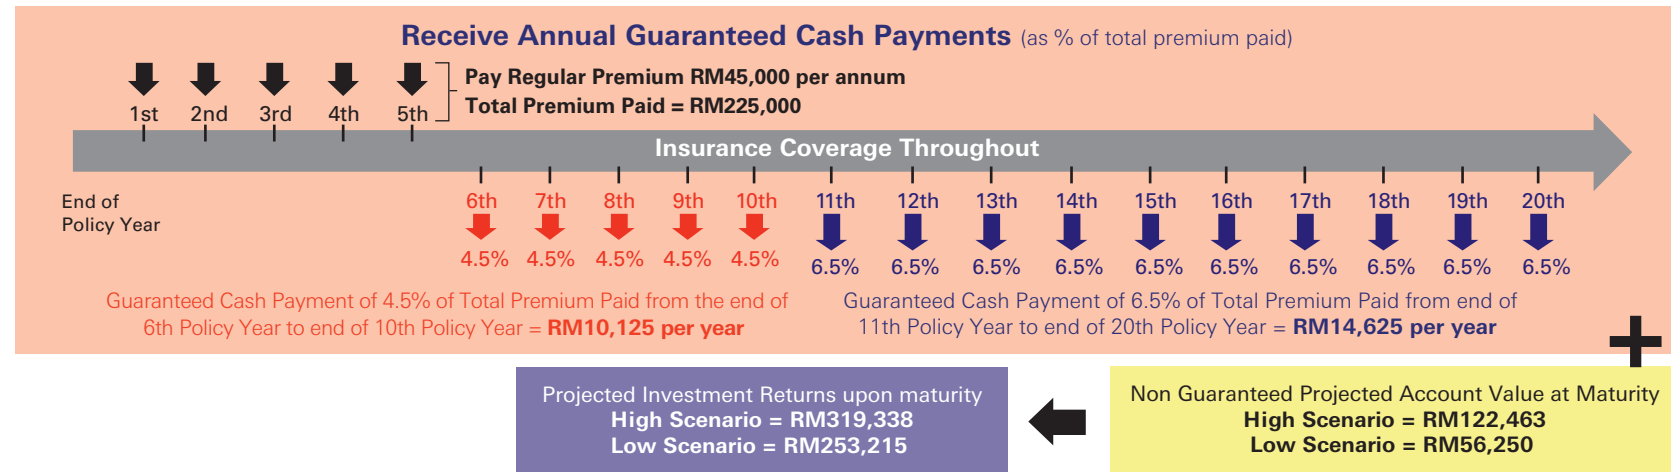

¹The percentage of Guaranteed Cash Payment (GCP) shall depend on the chosen premium payment term (Single Premium or Regular Premium) and type of GCP (immediate GCP or deferred GCP). The type of GCP shall be selected at the inception of the policy. The GCP and Guaranteed Maturity Benefit will only be payable provided that all premiums due and any interest charged on late premiums and any other indebtedness to Allianz Life are paid.

HSBC's UniversalTreasure Plus - Projected Investment Returns

This diagram assumes Female Life Assured aged 49 years old with, who selected **regular premium mode of RM45,000 and Deferred Guaranteed Cash Payment (GCP)**. (When the GCP is due and payable, she chose to withdraw it).

INCREASING GUARANTEED ANNUAL INCOME

	Total Payout over 20 years	
Non Guaranteed Projected Account Value at Maturity	High Scenario RM122,463	Low Scenario RM56,250
Total Projected Investment Returns upon maturity	High Scenario RM319,338	Low Scenario RM253,215
Annualised Return upon Policy maturity	Low Scenario	High Scenario
Guaranteed Annualised Return	0.92%	
Total Annualised Return	0.92%	2.57%

- The guaranteed annualised return is projected based on the illustrated total premiums paid, total Guaranteed Cash Payment (GCP) and guaranteed Maturity Benefit, i.e. 25% of Total Premiums Paid.
- The total annualised return is projected based on the illustrated total premiums paid, total Guaranteed Cash Payment (GCP) and projected Maturity Benefit.

Important Notes:

- Upon the policy maturity at the end of the 20th policy year, you will receive the higher of guaranteed 25% of Total Premium Paid or non-guaranteed Account Value at maturity. The Account Value and potential upside is not guaranteed and may vary according to the actual investment performance of Allianz Universal Life Fund II.
- High scenario is illustrated at the rate of return of 5% p.a. Low scenario is illustrated at the rate of return of 2% p.a. The rate of return is subject to investment tax and Fund Management Charge. Please also refer to the Sales Illustration for projection on low and high scenario.
- Future crediting rates are not guaranteed and vary according to investment results experienced by Allianz Life. The crediting rate over a medium to longer term is likely to be positive however it is possible to have a negative crediting rate in any particular month or over a longer term.
- The GCP and Guaranteed Maturity Benefit will only be payable if all premiums due and any interest charged on late premium and any other indebtedness to Allianz Life are paid at the end of policy year.
- Customer may choose the desired GCP Payout Option at the inception of the policy.
- The Premiums that You pay contribute to both the savings and protection elements of the product, e.g., Death Benefit. If You are looking for financial products with savings element, You may wish to compare annualised returns of this Policy with the effective returns of other investment alternatives.
- For additional info please refer to the Key Feature Document, Sales Illustration, Product Disclosure Sheet and Fund Disclosure Sheet of HSBC's UniversalTreasure Plus.

For her plan, we intend to receive the Guaranteed Cash Payment starting from the end of 6th policy year, so that we can use the payout as a source of guaranteed income after I retire and pay for whatever expenses that may crop up then.

Better yet, we intend to withdraw the Guaranteed Cash Payment annually, so that we can use the payout to live it up a little. I mean wouldn't it be fantastic to be able to use the cash payments to travel instead of dipping into our other savings?

All in all, I walked away from the meeting very pleased with my decision and a summary of the benefits I would be receiving for the next 20 years. It definitely eased my worries. My wife is very happy too, just thinking of our future ahead. She is quite sure she is getting her honeymoon, at last. I think, she deserves even a second and third one.

What HSBC's UniversalTreasure Plus can do for you :

- 1. Grow your retirement funds to secure your desired retirement lifestyle, as well as get insurance coverage**

With just a one-off single premium or limited 5 years regular premium payment, you get to enjoy 20 years of insurance coverage whilst securing and growing your retirement funds.

- 2. Get the flexibility to receive guaranteed annual income immediately or deferred to end of 6th year**

Depending on your retirement lifestyle spending, you can choose to receive Guaranteed Cash Payment starting from end of 1st policy year or end of 6th policy year, or to deposit with Allianz Life to earn interest or to reinvest it into Allianz Universal Life Fund II to potentially gain a higher investment upside.

- 3. To help cushion the impact of inflation on your retirement funds with the increasing guaranteed annual income**

The increasing Guaranteed Cash Payment will help to cushion the impact of inflation and help your retirement plan to stay on course.

- 4. Boost your retirement funds with potential upside at maturity**

Upon the policy maturity at the end of the 20th policy year, you will receive the higher of: guaranteed 25% of Total Premium Paid or non-guaranteed Account Value¹ at maturity.

¹The Account Value and potential upside is not guaranteed and may vary according to the actual investment performance of Allianz Universal Life Fund II. High scenario is illustrated at the rate of return of 5% p.a. Low scenario is illustrated at the rate of return of 2% p.a. Future rate of return are not guaranteed and vary according to investment results experienced by Allianz Life. The rate of return over a medium to longer term is likely to be positive however it is possible to have a negative rate of return in any particular month or over a longer term. The rate of return is subject to investment tax and Fund Management Charge. Please also refer to the Sales Illustration for projection on low and high scenario.
